ROAD TRIP TRAINING

Move. Reset. Stay sharp.

An easy travel-day session. Finish feeling better than when you started.

Bring: running shoes, soccer ball, foam roller, lacrosse ball, water and a mat.

01 Soft tissue + mobility | 15–20 min

Complete the checklist on page 2 before the jog. Work both sides, use light-to-moderate pressure, and keep every movement comfortable.

02 Continuous easy jog | 20 min

Keep a conversational pace throughout. No intervals or hard finish.

03 Core circuit | 3 sets, immediately after jogging

Bilateral glute bridge	20 seconds
Single-leg glute bridge	10 seconds each leg
Single-arm plank	10 seconds each arm
Dead bug	30 seconds
Forearm side plank	20 seconds each side

Hold bridges steady. In the single-arm plank, use a wide foot stance and keep hips square. Move slowly on dead bugs; keep breathing. Rest 30–45 seconds between sets.

04 Juggling or light passing | 15–20 min

Relaxed touches, both feet, clean first touch. Keep movement light.

05 Long balls | 10–20 min, if you can

Optional if space and a partner are available. Build distance gradually; focus on clean technique, not maximum power.

Travel reset: Walk and move your ankles at stops. Hydrate throughout the day.

MOBILITY + SOFT TISSUE

Your pre-jog reset

One round • both sides • approximately 15–20 minutes • tap blue links for Vimeo

Foam roll quads — 45 sec / side
Roll the front of the thigh slowly; stay off the kneecap.
HSS quad rolling • vimeo.com/456353674

Foam roll IT-band region — 30 sec / side
Light pressure on outer-thigh muscle; avoid grinding directly into the band or knee.
HSS IT-band technique • vimeo.com/456342218

Foam roll calf + Achilles region — 45 sec / side
Roll calf muscle down toward the lower calf; avoid direct pressure on the Achilles tendon.
HSS calf rolling • vimeo.com/456564850

Lacrosse-ball feet smash — 30 sec / foot
Roll the arch gently; control pressure and avoid pressing on bone.
Foot rollout • vimeo.com/656812093

Lacrosse-ball glute max smash — 30 sec / side
Work the fleshy back of the buttock; avoid any spot that causes tingling.
General glute ball massage • vimeo.com/407886016

Lacrosse-ball glute med smash — 30 sec / side
Use a wall to work the upper-outer buttock, below the pelvic rim; avoid the hip bone.
Glute med / TFL demo (roller alternative) • vimeo.com/705956570

TFL smash — 30 sec / side
Use gentle ball pressure just below and outside the front hip bone, not in the groin.
TFL demo (roller alternative) • vimeo.com/705956570

Hip flexor stretch — 30 sec / side
Half kneel, tuck pelvis slightly and squeeze the back-leg glute. Do not arch your back.
Half-kneeling stretch • vimeo.com/212795575

Figure 4 stretch — 30 sec / side
On your back, cross ankle over opposite thigh and gently draw the legs toward you.
Supine figure 4 • vimeo.com/571671097

Adductor floss — 8 slow reps / side
From all fours, extend one leg sideways and rock hips back, then forward.
Adductor rockback • vimeo.com/982001738

Hamstring floss — 8 slow reps / side
On your back, support thigh and slowly straighten then bend the knee in an easy range.
Supine hamstring floss • vimeo.com/257039864

“Smash” means controlled pressure, not maximum force. Stop for sharp pain, numbness or tingling. Flossing here means gentle movement, not compression-band work.
